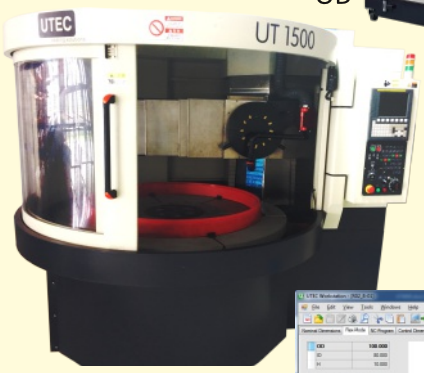
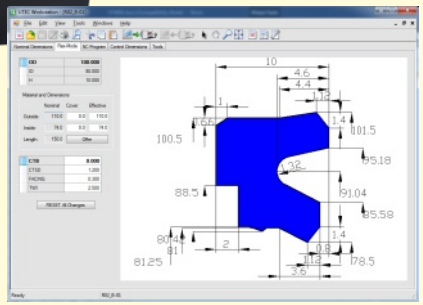
Machines

UT400E – the economic alternative for seals up to 400mm (15,7") OD

UT400 & UT750 – the workhorses for seals up to 400mm/750mm (15,7/29,5") OD



UT1500 – The BIG solutions for seals between 600 and 1500mm (between 23,6 and 59")



All UTEC machines come equipped with the highly flexible, powerful and user-friendly UTEC "FLEX" software, pre-installed on a PC with Microsoft Windows operating system.

All UTEC seal machining systems come fully equipped with a 12-station hydraulic tool turret, chip cutter, powerful suction unit, a set of tools and high-quality aluminum chuck jaws.

Just Plug in & Machine!

Raw Materials

UTEC Sealing Solutions offer a wide range of raw materials to fulfill the needs of hydraulic and pneumatic seal production as well for engineered plastic parts:

Polyurethanes:

PU | H-PU | PU-FG | PU-LT | PU-SL
PU- X | PU-XH | PU-XS

Elastomers:

NBR | H-NBR | EPDM | FPM | MVQ

Thermoplastics & Engineering plastics:

POM | PA | PTFE | PEEK

Accessories

Microscopes (to verify the cutting edge of tool tips before, during and after sharpening)

AccuFinish tool lapping machine (to assure a longer service life of tool tips)

Band saws (for cutting wear and guide rings)

Circumference measuring tapes (various sizes, up to 1500mm)

Bevelling shears for cutting guide tapes
